Ops for Shops

opsforshops.com

Your software costs you time. I get it back.

Enterprise architecture for independent businesses. No platforms. No lock-in. Just systems that work.

SOUND FAMILIAR?

Disconnected Tools

Your POS says one thing, your books say another, and your CRM doesn't talk to either. You're entering the same data twice.

Numbers You Can't Trust

Inventory doesn't match sales. Month-end takes days. Every report feels like a guess because the data never agrees.

Hours Lost to Busywork

Manual invoices, duplicate data entry, chasing follow-ups. You started this business to do the work, not wrestle software.

WHAT I FIX

Vendor Alignment

Audit what you're paying for. Cut the dead weight. Make your POS, CRM, and accounting actually sync.

Data Cleanup

Find where the numbers go wrong and fix the source. Safe migrations off old platforms. Books you can trust.

Automation

Invoices, follow-ups, and data entry on autopilot. If a computer should be doing it, I make it happen.

Let's Talk. Free. No Pitch.

30 minutes. You tell me what's going on, I tell you if I can help. No commitment, no sales deck. Just a straight conversation about your operations.

Scan to schedule

WHO I WORK WITH

- HVAC & Trades
- Plumbing & Electrical
- Law Firms
- Medical Offices
- Accounting Practices
- Restaurants
- Retail Shops
- Agencies
- Real Estate

Never send a human to do a computer's job.
